

Cafe Notturmo

“ We operate a very busy Italian restaurant right in the middle of Lygon Street, so for us we had to make sure we choose the right POS solution along with the team behind it to cater for our demanding needs. OrderMate for us was a clear stand-out of all the POS solutions we looked at. The way it handles complicated pizza orders, and then the ability to change the printing dockets in our many kitchens/prep areas was equally important to us. OrderMate and the people behind it know Pizza restaurants and have been a great support to myself and my team from the very first day we had it installed. ”

Cafe Notturmo

partnering with...

OrderMate

OrderMate POS is infamous with the words Pizza-Pasta-Coffee-Italian. We have for many years been known as the leader with these types of venues and Café Notturmo is a great example of how well suited OrderMate is in a very busy typical Italian restaurant in famous Lygon Street Carlton. Tables are constantly being turned over, so the speed of which staff get the orders to the prep areas is critical. There are around 400 seats in total and 3 separate different kitchen & pizza prep areas. OrderMate facilitates complex printing requirements with ease. Pizza half-half, extras and modifications are performed in almost every order so staff can quickly and confidentially make these changes.

Café Notturmo 179 Lygon Street
Carlton VIC 3053 Ph 03 9347 8286

Features/Benefits

Functions/Bookings

Avoid confusion with a large staff workforce by making sure the POS handles everything for you.

Multiple Shifts

Have shift staff be accountable for their very own float and reports.

Printer Notifications

Have different Prep areas know what is being made elsewhere, so orders get coordinated together.

Pizza Mods

Plus prawns, Minus anchovies, Minus a Little Salami, Double Cheese... all done with ease!

Split Bill

Avoid crowding around the main pay-off register and make it easy for staff to split bills.

Graphical Table Layout

Easily drag & drop tables to keep staff in synch when tables are being moved all the time.
